SUMMARY

QA automation engineer with 6 years of experience testing web applications and REST APIs for e-commerce and SaaS products. Builds maintainable UI and API test frameworks, wires them into CI pipelines, and works closely with developers to catch defects before release.

SKILLS

Test automation: Cypress, Selenium WebDriver, Playwright (basic), Page Object Model

Languages: JavaScript, TypeScript, Java, SQL

API testing: REST APIs, Postman, Newman, REST Assured

CI/CD & tools: Jenkins, Git, Jira, TestRail

Databases: PostgreSQL, MySQL

EXPERIENCE

QA Automation Engineer · ShopLane (e-commerce platform) 2021 – present

- Built a Cypress + TypeScript end-to-end suite of 320 tests covering checkout, accounts and promotions.
- Created Postman/Newman API regression packs for 45 REST endpoints, run nightly in Jenkins.
- Reduced flaky test rate from 9% to under 2% by introducing stable selectors and network stubbing.
- Wrote SQL scripts to seed and verify order data in PostgreSQL test environments.

QA Engineer · Brightdesk (B2B SaaS) 2019 – 2021

- Automated regression tests with Selenium WebDriver and Java, cutting manual regression from 3 days to 1.
- Tested REST APIs with REST Assured and documented defects in Jira for a team of 12 developers.

Junior Software Tester · Pixel Forge 2018 – 2019

- Executed manual and exploratory testing for mobile and web releases; maintained test cases in TestRail.

EDUCATION

BSc Computer Science, University of Leeds (2018) · ISTQB Foundation Level
